Denny:

I do not have a name for it.

I am still referring to it as "the area where Professor Valentine found the drums".

As you can see from the attached SCCWRP report, there are multiple historical dump sites in the area.

Professor Valentine found the drums near historical Dumpsite #2 (page 2 of the PDF).

This issue is also bigger than Montrose.

Other companies disposed their wastes at Dump Site #2 also.

Is DTSC trying to address only this dump site, all the historical dump sites in San Pedro Basin or all the ocean dump sites on the Southern California Bight?

The name of the site should be based on the problem you are trying to address...

My two pennies..

J

Good Morning Judy, that LA Times article sure set off a bunch of discussion. I have been tasked with creating a new site in my tracking database. We just want to be consistent with EPA on naming the new site. We were thinking of calling it the Deep Water Disposal Sites or maybe Southern California Deep Water Disposal Sites. Does EPA have a current title for these projects? Or how is EPA referring to this?
